CCM-006

SELECTED ITEM

CCM-014-autonomous-payment-agent-2026-06-13 · Governance Engineering Implemented failed for Autonomous Payment Agent

Finding for Autonomous Payment Agent. Owner: Russell. Due: Jul 13, 2026.

WHY THIS EXISTS

Governance engineering gaps: implementation not validated: GE-APA-TRANSACTION-LIMITS-001; runtime control not monitored: GE-APA-TRANSACTION-LIMITS-001; implementation not validated: GE-APA-DUAL-APPROVAL-001; runtime control not monitored: GE-APA-DUAL-APPROVAL-001; implementation not validated: GE-APA-KILL-SWITCH-001; runtime control not monitored: GE-APA-KILL-SWITCH-001.

EVIDENCE USED

CCM-014 · Governance Engineering Implemented

IMPACT

A control objective is not enough for audit or supervision unless the platform can show how the control is implemented, evidenced, monitored, and validated.

WHAT HAPPENS NEXT

Review Finding

Recommended action

Review finding impact, update remediation evidence, or document exception/risk acceptance.

Review Finding

Request Evidence

Review Exception

Accept Risk

Escalate

Verify Evidence

Review exact object

Persistent proof path

Control to evidence requirement to source to artifact to assurance to traceability to package.

CONTROL	EVIDENCE REQUIREMENT	EVIDENCE SOURCE	EVIDENCE ARTIFACT	ASSURANCE	TRACEABILITY	PACKAGING
CCM-014 Control or governance object affected by this item.	Governance Engineering Implemented Evidence expectation or review requirement	Monitoring finding Source system, connector, or governance record used.	CCM-014-autonomous-payment-agent-2026-06-13 Artifact, metadata record, finding, or validation evidence.	OPEN Current validation or confidence state.	Autonomous Payment Agent How this links back to governance ownership.	Blocked Whether this can support audit or committee review.

Workflow State

New

In Review

Waiting on Evidence

Remediation Planned

Exception Requested

Accepted Risk

Resolved

Closed

Why this matters: the workflow state shows whether governance is waiting on evidence, remediation, exception handling, risk acceptance, or closure.

Supporting governance views

Risk Management

Inherent and residual AI risk, treatment plans, and acceptances.

Regulatory Compliance

Cross-system regulatory coverage, gaps, and jurisdiction exposure.

Control Monitoring

Continuous control testing, findings, and exceptions.

Evidence Repository

Proof objects, evidence search, traceability, downloads, and audit packaging.

Evidence Health

Current, expiring, expired, missing, and invalid evidence across the portfolio.

AI Lifecycle

Intake, development, testing, pilot, production, and retirement gates.

Governance Engineering

Control to implementation to evidence to monitoring.
